

## Portway Dental Practice

Cosmetic purpose

The prognosis, or likelihood of success, of the treatment is

My fixed bridge restoration is estimated to cost £      and is estimated to take      visit(s) to complete.

### Alternative to Fixed Bridge Restorations

Depending on my diagnosis, there may or may not be alternatives to a fixed bridge restoration that involve other types of dental care. I understand that possible alternatives to a fixed bridge restoration may be:

- A dental Implant and implant-supported crown restoration.
- Replacement of the missing tooth or teeth by removable partial denture. Partial dentures are removed from the mouth for cleaning. They are supported by the remaining teeth and the jawbone and retained by clasping selected remaining teeth or by using other typed of attachments which may require placement crowns or other restorations.
- No treatment. I may decide not to replace the missing tooth or teeth. If I decide upon no treatment, my teeth may shift over time, causing chewing, periodontal (gum), or jaw joint (TMJ) problems.

[Forename/Surname] I have had an opportunity to ask questions about these alternatives and any other treatments I have heard of thought about including

### Risk of Fixed Bridge Restorations

I have been informed and fully understand that there are certain inherent and potential risks associated with fixed bridge restorations. I understand that the nerves inside my teeth may be irritated by treatment, and I may experience pain or discomfort during and/or after treatment. My teeth may become more sensitive to hot and cold liquids and foods. I understand that root canal treatment may become necessary on the support (abutment) teeth at any time during or after treatment and may not be avoidable. I understand that a fixed bridge restoration may not relieve any symptoms I may be experiencing.

I understand that once prior fillings and decay are removed, it may reveal a more severe condition of my tooth or teeth. This condition may require periodontal (gum) surgery to uncover more of the tooth, may require one or more root canal treatments in addition to a fixed bridge restoration, or may instead require the extraction of the tooth or teeth.

I understand that I may notice slight changes in my bite. I understand that during and for several days following treatment, I may experience stiff and sore jaws from keeping my mouth open.

I understand there may be injury to my gums around and near the teeth that will support the bridge. I understand that my gums may recede after the completion of my fixed bridge restoration. I understand that poor eating habits, oral habits (smoking, fingernail biting, etc.), and poor oral hygiene will negatively affect how long my fixed bridge lasts.

## Portway Dental Practice

I understand that I will be given a local anaesthetic injection and that in rare situations, patients have had an allergic reaction to the anaesthetic, an adverse medication reaction to the anaesthetic, or temporary or permanent injury to nerves and/or blood vessels from the injection. I understand that the injection area(s) may be uncomfortable following treatment and that my jaw may be stiff and sore from the anaesthetic injection.

I understand that once a fixed bridge is started, I must promptly return to have the fixed bridge completed. If I fail to return for completion of the fixed bridge, I risk decay, the need for root canal treatment, tooth fracture and loss of the teeth involved.

Other foreseeable risks not stated above include:

[Forename/Surname] I have had an opportunity to ask questions about these risks and any other risks I have heard or thought about, including

### Acknowledgment

I have provided as accurate and complete a medical and personal history as possible, including antibiotics, drugs, or other medications I am currently taking, as well as those to which I am allergic. I will follow any and all treatment and post-treatment instructions as explained and directed to me and will permit the recommended diagnostic procedures, including X-rays.

realize that in spite of the possible complications and risks, my recommended fixed bridge restoration is necessary. I am aware that the practice of dentistry is not an exact science, and I acknowledge that no guarantees, warranties, or representations have been made to me concerning the results of the treatment.

I, [ ], have received information about the proposed treatment. I have discussed my treatment with Dentist [ ] and have been given an opportunity to ask questions and have them fully answered. I understand the nature of the recommended treatment, alternate treatment options, the risks of the recommended treatment, and the risks of refusing treatment.

### I wish to proceed with the recommended treatment.

[ ], I understand this treatment can also be performed by a prosthodontist (a fixed bridge specialist). I understand the risks and elect to have this procedure performed by Dentist [ ]. I understand that if any unexpected difficulties occur during treatment, I may be referred to a prosthodontist for further restorative care of this tooth.
